

# **milkrite | InterPuls**

*Improving every farm we touch*

**milkrite | InterPuls**  
Two leading brands  
are now one

Providing your farm with  
state-of-the-art  
technologies & services

Improving milking performance has always been our priority

**Every farm** can benefit from **the innovative solutions** developed by milkrite | InterPuls from years of experience

**Every farm is different:**  
We **listen** to your needs very carefully  
and build a strong and reliable  
relationship through **innovation,**  
**quality** and **support**

We will always be by your side,  
as we care for animals, our customers  
and partners around us

We will support you every  
step of the way

**We want your animals  
to feel better**

**Values:** sustainability and trustworthiness

We invest in R&D and care for the environment to create a sustainable business model so you can trust us for a long term future partnership

## **Farms of the future**

### **Fully integrated systems**

where all the aspects of herd-management & milking connect to one another.

**Monitoring, controlling, efficient milking**

## CONTROL

It is the controlling technology of the milking process. It starts in the final phases of the milking, taking control of detachment, washing and reporting for efficient milking control.

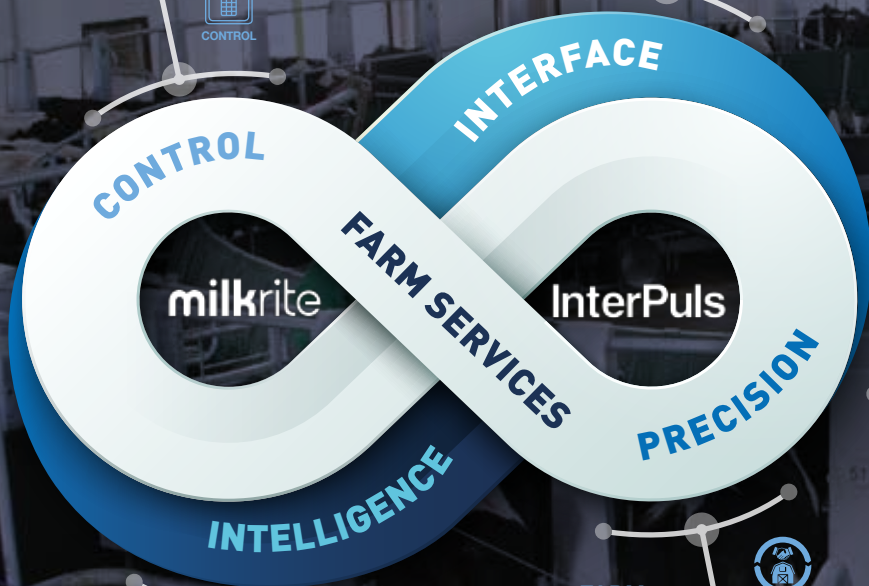

CONTROL

## INTERFACE

It's the part of the system interfacing with the animal, removing the milk away from the teat efficiently.

INTERFACE

PRECISION

## PRECISION

It is at the heart of the milking, which requires precision for creating and regulating the vacuum level required for an efficient milking process.

## FARM SERVICES

FARM SERVICES

It provides a monthly lease rental option for Interface, Precision and Intelligence equipment, removing the burden of a capital purchase and delivering fully serviced and warranted equipment.

## INTELLIGENCE

The advanced segment, to enable the intelligence to provide management of the farm data for improved efficiency and farm performance.

INTELLIGENCE

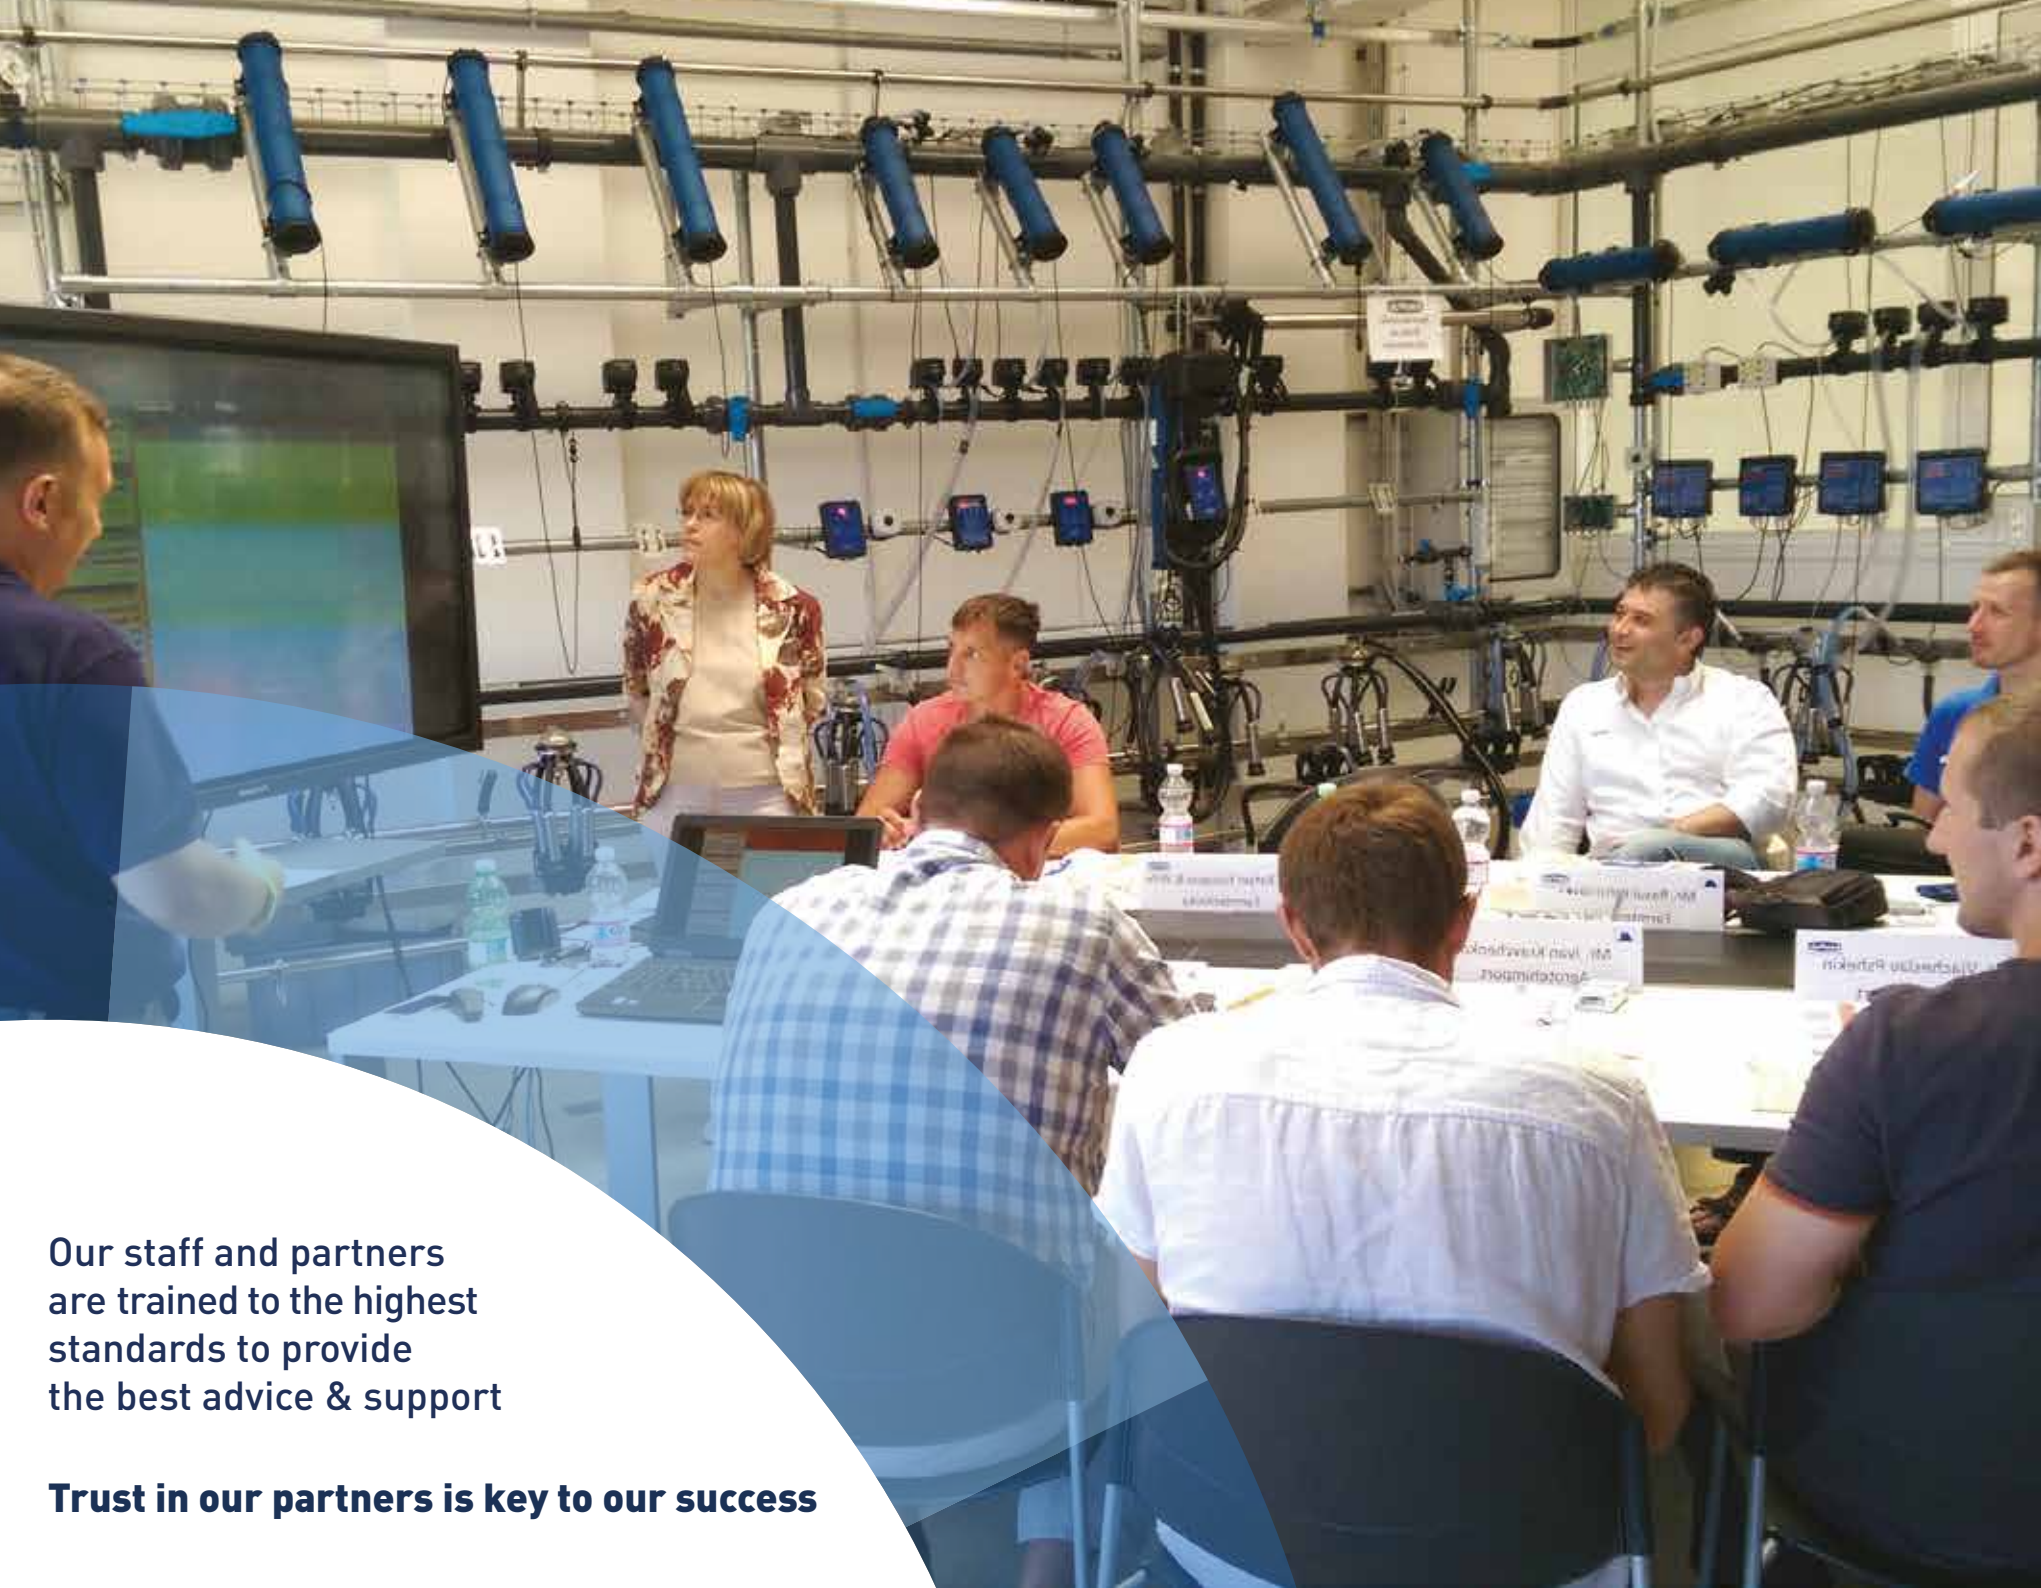

We are at the very **heart of the dairy farm process** and provide end-to-end **milking point solutions** & farm focused **herd management**
