# Sangrovit® CSPX

## Plant based product derived from Macleaya Cordata (Plume Poppy)

- Produced by Phytobiotics, a company based in Germany, specialising in the manufacture and distribution of high quality feed additives.
- Classified as a Phytonutrient.
- For regulation of intestinal inflammation, stabilisation of intestinal integrity, maintenance of feed intake, increase in performance, stress relief.

### INSTRUCTIONS FOR USE

#### DOSAGE ADMINISTRATION

2g/calf/day for 21 days, or for period of challenge (5-10 days).

#### METHOD 1:

Mix with water at a rate of 100g Sangrovit per 1 litre water, add 20ml per calf to Whole Milk/CMR. Dispense using a drench gun or syringe into individual feeders or compartments, or mix into milk prior to feeding.

Can be direct fed or added to electrolytes.

Provides 50 doses per 1 litre water.

Use mix within 5 days.

*Note: 1kg Sangrovit in 10 litres water provides 500 x 20ml doses.*

#### METHOD 2:

Weigh 2g Sangrovit per calf and mix with water in shaker before adding to Whole Milk/CMR.
