

Safety Data Sheet

according to WHS Regulations

Printing date 05.02.2020

Revision: 05.02.2020

1 Identification

Product Name: REDENE (READY TO USE)

Other Means of Identification: Mixture

Other Name: Iodophor teat dip and spray; dilute surfactant solution containing 0.5% available iodine

Recommended Use of the Chemical and Restriction on Use: Teat dip and spray for dairy cows

Details of Manufacturer or Importer:

DASCO Pty Ltd
 24 - 26 Helen Street
 Heidelberg Heights VIC 3081

Phone Number: 03 9459 7004

Emergency telephone number: National Poison Information Centre: 13 11 26

2 Hazard(s) Identification

Hazardous Nature:

Not classified as Hazardous according to the Globally Harmonised System of Classification and Labelling of Chemicals (GHS) and Safe Work Australia criteria.

Not classified as Dangerous Goods according to the Australian Code for the Transport of Dangerous Goods by Road and Rail. (7th edition)

Aquatic Acute 3 H402 Harmful to aquatic life.

Aquatic Chronic 3 H412 Harmful to aquatic life with long lasting effects.

Signal Word None

Hazard Statements

H412 Harmful to aquatic life with long lasting effects.

Precautionary Statements

P273 Avoid release to the environment.

P501 Dispose of contents/container in accordance with local/regional/national regulations.

3 Composition and Information on Ingredients

Chemical Characterization: Mixtures

Description: Mixture of substances listed below with nonhazardous additions.

Hazardous Components:

CAS: 56-81-5	Glycerol	10%
CAS: 84133-50-6	Alcohols, C12-C14-secondary, ethoxylated 	<5%
CAS: 7553-56-2	Iodine 	0.5%

4 First Aid Measures

Inhalation: If inhaled, remove to fresh air. Seek medical attention if breathing problems develop.

Skin Contact:

In case of skin contact, immediately remove contaminated clothing and wash affected areas with water and soap. Seek medical attention if symptoms occur.

(Contd. on page 2)

Safety Data Sheet

according to WHS Regulations

Printing date 05.02.2020

Revision: 05.02.2020

Product Name: REDENE (READY TO USE)

(Contd. of page 1)

Eye Contact:

In case of eye contact, rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Seek medical attention.

Ingestion:

If swallowed, do not induce vomiting. If vomiting occurs spontaneously, keep head below hips to prevent aspiration. Do not give anything by mouth to an unconscious person. Seek immediate medical attention.

Symptoms Caused by Exposure:

Inhalation: May cause irritation, cough and shortness of breath. Iodine vapours are irritating from 0.1 ppm. Effects may be severe in sensitised individuals.

Skin contact: May cause mild skin irritation.

Eye contact: May cause mild eye irritation.

Ingestion: May cause gastric upset with nausea, vomiting and possible diarrhoea. Very large doses may be harmful, and may lead to thyroid insufficiency. Aspiration of fluid into lungs during swallowing or vomiting may cause chemical pneumonitis (irritation of lung tissues) and pulmonary oedema. Onset of symptoms may be delayed.

5 Fire Fighting Measures

Suitable Extinguishing Media: Water fog or fine water spray.

Specific Hazards Arising from the Chemical:

No fire or explosion hazard exists. Hazardous combustion products include iodine, hydrogen iodide and carbon dioxide.

Special Protective Equipment and Precautions for Fire Fighters:

When fighting a major fire wear self-contained breathing apparatus and protective equipment.

6 Accidental Release Measures

Personal Precautions, Protective Equipment and Emergency Procedures:

Wear approved self-contained breathing apparatus and full protective clothing. Evacuate all non-essential personnel from affected area. Do not breathe vapours. Ensure adequate ventilation.

Environmental Precautions:

In the event of a major spill, prevent spillage from entering drains or water courses.

Methods and Materials for Containment and Cleaning Up:

Stop leak if safe to do so and absorb spill with sand, earth, vermiculite or some other absorbent material. Collect the spilled material and place into a suitable container for disposal.

7 Handling and Storage

Precautions for Safe Handling:

Use of safe work practices are recommended to avoid eye or skin contact and inhalation of vapours. Food, beverages and tobacco products should not be stored or consumed where this material is in use. Always wash hands before smoking, eating, drinking or using the toilet. Wash contaminated clothing and other protective equipment before storage or re-use. Provide eyewash fountains and safety showers in close proximity to points of potential exposure.

Conditions for Safe Storage:

Store in original container in a cool, dry and well ventilated area. Keep container tightly closed when not in use. Protect from physical damage and direct sunlight and heat. Keep away from oxidising agents.

8 Exposure Controls and Personal Protection

Exposure Standards:**CAS: 56-81-5 Glycerol**WES TWA: 10 mg/m³**CAS: 7553-56-2 Iodine**WES Peak limitation: 1 mg/m³, 0.1 ppm**Engineering Controls:**

Ensure adequate ventilation of the workplace. If handling industrial quantities, or if aerosol risk exists, provide exhaust ventilation or other engineering controls to keep the airborne concentrations as low as possible.

Respiratory Protection:

Use an approved vapour respirator under conditions where exposure to the substance is apparent (e.g. generation of high concentrations of mist or vapour, inadequate ventilation, development of respiratory tract irritation) and engineering controls are not feasible. See Australian Standards AS/NZS 1715 and 1716 for more information.

Skin Protection:

Rubber or plastic gloves. See Australian/New Zealand Standard AS/NZS 2161 for more information. When selecting gloves for use against certain chemicals, the degradation resistance, permeation rate and permeation breakthrough time should be considered. Impervious overalls, plastic apron and boots should be worn when handling industrial quantities. See Australian/New Zealand Standard AS/NZS 4501 for more information.

Eye and Face Protection:

Eye and face protectors for protection against splashing materials or liquid. See Australian/New Zealand Standard AS/NZS 1337 for more information.

9 Physical and Chemical Properties

Appearance:

Form:	Slightly frothing liquid
Colour:	Dark brown
Odour:	Iodine odour
Odour Threshold:	No information available
pH-Value:	3 - 5
Melting point/freezing point:	No information available
Initial Boiling Point/Boiling Range:	From 100 °C
Flash Point:	Not applicable
Flammability:	Product is not flammable.
Auto-ignition Temperature:	No information available
Decomposition Temperature:	No information available
Explosion Limits:	
Lower:	Not applicable
Upper:	Not applicable
Vapour Pressure:	No information available
Density:	No information available
Relative Density:	1 g/mL
Vapour Density:	No information available
Evaporation Rate:	No information available
Solubility in Water:	Miscible
Partition Coefficient (n-octanol/water):	No information available
% Volatiles by Volume:	About 93 % (mostly water)

VOC: <1 %

10 Stability and Reactivity

Possibility of Hazardous Reactions: May react with strong oxidising agents.**Chemical Stability:** Stable under normal conditions.**Conditions to Avoid:** Heat and light.**Incompatible Materials:** Oxidising agents.**Hazardous Decomposition Products:** Iodine and hydrogen iodide.

11 Toxicological Information

Toxicity:**LD₅₀/LC₅₀ Values Relevant for Classification:****CAS: 56-81-5 Glycerol**Oral LD₅₀ 12,600 mg/kg (rat)**CAS: 7553-56-2 Iodine**Oral LD₅₀ 14,000 mg/kg (rat)**Acute Health Effects****Inhalation:**

May cause irritation, cough and shortness of breath. Iodine vapours are irritating from 0.1 ppm. Effects may be severe in sensitised individuals.

Skin: May cause mild skin irritation.**Eye:** May cause mild eye irritation.**Ingestion:**

May cause gastric upset with nausea, vomiting and possible diarrhoea. Very large doses may be harmful, and may lead to thyroid insufficiency. Aspiration of fluid into lungs during swallowing or vomiting may cause chemical pneumonitis (irritation of lung tissues) and pulmonary oedema. Onset of symptoms may be delayed.

Skin Corrosion / Irritation: Based on classification principles, the classification criteria are not met.**Serious Eye Damage / Irritation:** Causes serious eye damage.**Respiratory or Skin Sensitisation:** Based on classification principles, the classification criteria are not met.**Germ Cell Mutagenicity:** Based on classification principles, the classification criteria are not met.**Carcinogenicity:**

This product does NOT contain any IARC listed chemicals.

Iodinated glycerol is reported as neoplastic and carcinogenic by RTECS criteria (oral : rat, mouse).

Reproductive Toxicity: Based on classification principles, the classification criteria are not met.**Specific Target Organ Toxicity (STOT) - Single Exposure:**

Based on classification principles, the classification criteria are not met.

Specific Target Organ Toxicity (STOT) - Repeated Exposure:

Based on classification principles, the classification criteria are not met.

Aspiration Hazard: Based on classification principles, the classification criteria are not met.**Chronic Health Effects:**

Repeated exposure to iodine may lead to thyroid insufficiency.

Overexposure to iodine may also lead to sensitisation and allergy, skin rash, swelling of the vocal chords, a general allergic reaction, and pain and swelling in the joints.

Chronic exposure to iodine may cause tremors, insomnia, rapid heart beat, weight loss and iodism

(Contd. on page 5)

Safety Data Sheet

according to WHS Regulations

Printing date 05.02.2020

Revision: 05.02.2020

Product Name: REDENE (READY TO USE)

(Contd. of page 4)

(characterised by salivation, nasal discharge, sneezing, conjunctivitis, fever, laryngitis, bronchitis, stomatitis and skin rashes).

Existing Conditions Aggravated by Exposure:

Pre-existing skin disorders, thyroid dysfunction and sensitivity to iodine.

12 Ecological Information

Ecotoxicity:**Aquatic toxicity:** Harmful to aquatic life with long lasting effects.**Persistence and Degradability:** This product is considered to be biodegradable.**Bioaccumulative Potential:** No further relevant information available.**Mobility in Soil:** No further relevant information available.**Other adverse effects:** No further relevant information available.

13 Disposal Considerations

Disposal Methods and Containers: Dispose according to applicable local and state government regulations.**Special Precautions for Landfill or Incineration:**

Please consult your state Land Waste Management Authority for more information.

14 Transport Information

UN Number Not regulated**Proper Shipping Name** Not regulated**Dangerous Goods Class** Not regulated**Packing Group:** Not regulated

15 Regulatory Information

Australian Inventory of Chemical Substances:

CAS: 7732-18-5	Water
CAS: 56-81-5	Glycerol
CAS: 84133-50-6	Alcohols, C12-C14-secondary, ethoxylated
CAS: 7553-56-2	Iodine

Standard for the Uniform Scheduling of Drugs and Poisons (SUSMP) - Poison Schedule:

Not Scheduled.

16 Other Information

Date of Preparation or Last Revision: 05.02.2020**Last Revision of MSDS:** 01.09.2009**Prepared by:** MSDS.COM.AU Pty Ltd
