

Germidet

Australian-made non-irritant and biodegradable germicidal detergent and general disinfectant.

- Use for cleaning and disinfecting animal housing.
- Use as a general farm disinfectant for cleaning calf teats/feeders.
- Safe to use in the home as a general disinfectant.
- Non-corrosive and biodegradable.
- Cuts through grime at a fraction of the cost.

“Our sanitising products go twice as far for half the price of the competitors and we get the same kill.”

– Elly Baranowski, Hooper Farms, Gippsland.

GERMIDET – DIRECTIONS FOR USE

SITUATION	PEST	RATE PER 10L WATER	CRITICAL COMMENTS
CALF SHEDS			
	Bacterial organisms	200 ml	Spray 300ml of diluted solution every square metre <i>For best results, use in conjunction with ZorbiFresh Active</i> <i>Cost-effective general farm disinfectant for cleaning calf teats/feeders</i>
POULTRY			
DRINKING WATER		6 ml	Add to drinking water
HOUSING & HATCHERY	Bacterial organisms	30 ml	Clean walls, floors, incubators and egg trays
		200 ml	Spray when infection is evident
PIGS			
GENERAL DISINFECTANT	Bacterial organisms	30 ml	Scrub walls, floors, troughs and other feeding utensils with solution. Rinse with fresh water prior to scrubbing
		200 ml	Spray when infection is evident, repeat at least every two weeks. To prevent infection spray the piggery every day or twice a day if necessary
WALK THROUGH FOOTBATHS		60 ml	Make up solution and put in bath
COUNCIL WATER TOWERS			
	Algae	10 ml	For prevention and control of algae on structures (Not water treatment)

THREE MUST-HAVES FOR YOUR CALF SHED SET-UP

Germidet is a cost-effective (non-corrosive and biodegradable) disinfectant that is as versatile cleaning animal housing as it is being used as a general farm disinfectant. It makes it as ideal for washing calf coats as it is for giving calf feeders a once-a-week germicidal wash-down.

ZorbiFresh™ Active – Natural powdered bedding conditioner that kills pathogens on impact, and absorbs up to 199% of its weight in moisture. ZorbiFresh™ Active leaves your bedding drier, reduces odour, and keeps killing pathogens 24 hours post-application. It also makes your working environment healthier for your animals, you, and your employees. *Contains Eucalyptus for natural fly repellent.*

Calf-Safe – 100% organic non-rinse disinfectant for calf-pen set-up in between calf groups. Ideally use in conjunction with Germidet and ZorbiFresh™ Active. Safe to fog-mist calf feeders and calves every day for an additional layer of protection for your calves.

Recommended best-practice for calf-shed hygiene set-up:

- Remove old bedding from the calves' sleeping area.
- Handwash solid walls, hay and grain feeders with **Germidet** (between groups of calves coming in).
- Dust **ZorbiFresh Active** on the floor (spread at 50g/m² under bedding, using a hand-held kitchen sieve to sprinkle lightly). **Note:** Apply **ZorbiFresh Active** weekly (and safely spot-treat bedding) for maintenance. It can be safely applied on the top of bedding.
- Maintain bedding depth at 15cm.
- Spray all the walls, feeders (including misting the whole pen area) with **Calf-Safe**.
- Safe daily disinfectant for calf feeders, teats, walls, calves and hard surfaces in pens.
