CALF-TEL®

MULTIMAX GROUP HOUSE

Dairy Dreams, LLC, Casco, WI

When calves raised individually are placed in large groups, the stress from competition and social pressure can lead to growth and health setbacks. Placing four to six similarly-sized, weaned calves in a Calf-Tel MultiMax is the best way to ease the transition. Continued growth and health will be attained as animals bond and develop a social group.

Optional Lifting Bracket

Large Entry Way

Optional Vent, Ideal for Ventilation and Observation

ADVANTAGES

Extremely durable and light in weight – the longest lasting hutch on the market.

Large entryway for maximum ventilation.

Extra hutch height – allowing animals to be housed in the unit longer.

Treated lumber base to provide a stable and secure foundation.

Ridge top ventilation for improved air circulation.

Optional rear vent for hot weather and observation tool.

Optional lifting bracket for easy lifting when moving.

RECOMMENDED SITES

Four common ways the MultiMax is used:

Prepared Site: Place the MultiMax on a well-drained surface (gravel, crushed stone or sand). This will keep calves dry and healthy. Outside pen required.

Rotating Site: Place one MultiMax in a small pasture and move the unit and its pen periodically.

Large Common Pasture: Place multiple MultiMax's in a large pasture with bigger groups. Position the units near each other, as the herd will not separate to housing in different locations.

Group/Robotic Feeding: When group feeding methods are being employed, the MultiMax provides an ideal group housing solution.

Dimensions	English	Metric
Outside	86.5" L x 107.5" W x 72" H	220cm x 273cm x 183cm
Inside Useable Calf Space	82" L x 102" W x 71" H	208cm x 259cm x 180cm
Hutch Weight	235 lbs.	107 kg.

Weight and dimensions may vary slightly.
