

We use Science and Technology to make dairy farming more profitable, enjoyable and sustainable.

Dairyking

Global Headquarters

Company profile.

Founded by the son of a dairy farmer, Dairyking has carved out a lasting global reputation for providing hi-tech dairy equipment for dairy farmers across the world. Dairyking is the only dairy equipment company in the world that makes 95% of its products in-house.

This gives the company the flexibility required to ensure its innovative products meet the needs of its customers in every market.

From concept to finished product with a devotion to research and development, Dairyking believes in making a better product than what the market expects and is why we invite you to come and *Experience the difference...*

Daviesway

*Australian distributor
for Dairyking*

Daviesway - serving Australian dairy farmers for over 100 years.

Daviesway is a privately owned company that has been providing dairy equipment to dairy farmers all around the world for over 100 years.

Founded in 1911 by the Davies family, the company CEO is John Davies, grandson of the founder. Since this early beginning Daviesway has developed into a major manufacturer and supplier of quality dairy equipment for Australia, New Zealand and other world markets.

From the beginning to the end of all projects, Daviesway ensure that the specification, design, construction and commissioning of the dairy more than meets customer satisfaction levels, something that is only achievable in a company with close and personal management capabilities like Daviesway.

Double Up

*Maximise efficiency with
minimum space..*

Install or Expand to a Double up shed and milk up to 500 cows per hour with minimum building costs.

- SmartStart units, no buttons, lift the unit and vacuum engages.
- Rapid exit or standard exit options.
- Heavy duty option available for 24-7 systems.
- Typically 4-5 cows milked per unit per hour (10 unit double up with 20 milking units – 80-100 cows/hour).
- Clear exit/breezeway option.
- Swiftflo heavy duty bailing option.
- Stainless steel cabinet and manure guard options.
- A milking unit for every cow.

SwiftFlo Swing

*Increase cows milked per hour
per milker...*

The Dairyking swing shed can milk up to 50% more cows per hour than a double up with the same number of milking units.

- Swing Start units, no buttons, swing the arm and vacuum automatically engages.
- Typically 6-8 cows milked per unit per hour (20 unit swing – 120-160 cows/hour).
- Rapid exit or standard exit options.
- Heavy duty option available for 24-7 systems.
- Stainless steel splash guard options.
- Swiftflo heavy duty bailing option.
- 1 milker can operate a 20 unit swing over.
- The most efficient shed on the market providing maximum kgs of milk/per person/per hour.

SwiftFlo Revolver

*Maximise throughput with
minimum labour...*

The Swiftflo Revolver Rotary is one of the most heavy duty and sustainable rotaries on the market integrated with the latest technology.

- Sizes range from 28 stall - 100 stall rotary (60 stall is popular).
- Typically 6 cows milked per unit per hour (50 stall – 300 cows/hour).
- SmartStart units, no buttons, lift the unit and vacuum engages.
- Complete stainless stall work option.
- Heavy duty option available for 24-7 systems.
- Multiple levels of automation options available.
- Typically 2 people can operate the rotary.
- Catwalk stairs or underground tunnel options available to enter center of rotary.

Retrofit Shed

Upgrade your existing shed with Dairyking technology...

Want to milk like Dairyking? Retrofit your shed today and reap the benefits of the Dairyking milking principles.

- Less Squawking – reduces the risk of cows getting mastitis – saving you money.
- Lower vacuum during rest phase of system – reduces stress and helps improve teat end health which in turn helps reduce the risk of mastitis.
- 1 pulsator for 2 units – saving you money on servicing charges.
- Better milk out and typically faster milking – better throughput in your shed therefore raising efficiency.
- Better welfare for your cows – happier cows have less issues which saves you money.

Drafting Gate

Sort cows into each pen automatically with no stress...

- The best built and most sustainable draft gate on the market.
- Fast and accurate for excellent cow flow.
- Minimises stress on your cows – happier cows.
- Pen changes for cows are done at the touch of a button.
- 2 and 3 way sort gate options available.
- Draft gate can be completely standalone or fully integrated with the Dairyking shed and MooMonitor+.
- Heavy duty to withstand substantial wear and tear.
- Comes with in pit control box.
- Great for sorting cows that need attention after milking e.g. lameness, vet check, mastitis, culling etc.
- Standalone system – can be easily integrated into your dairy system.

Feedrite & Milk Manager

Individual nutrition for every cow in the herd...

- Accurate feed dispensing.
- Corrosion resistant hopper and stainless chutes.
- Completely enclosed hopper to reduce dust and rodents.
- Complete with in pit feeder control boxes.
- Pre-programmed batch feed amounts.
- 'Hot key' coloured pre-programmed feed buttons.

And when combined with Milk Manager and Auto ID

- Appetiser feeding.
- Challenge feeding.
- Feed to yield, weight or stage of lactation.
- Feeding cows individually promotes better milk yield, fertility and better herd health.

Complete feed management from Dairyking

SwiftFlo Bailing

Ensuring safety with improved cow flow & throughput

Tailor built to suit the size of your cows and great for keeping heifers in position.

- Better cow flow – increases the number of cows milked per hour.
- Allows for the safe and easy treatment of cows while they are in the shed.
- Operate the system from anywhere in the pit.
- Ideal for 24-7 systems –heavy duty stall work option available
- Ensures safety for the milker and for the smaller cows in the herd.
- Rapid exit and rapid release options.
- Can be fitted with feed systems.
- Ideal shed upgrade.

Comfort + Flooring

Improving comfort improves operator performance

Adjustable floor level allows for different operators to select their ideal working level for claw attachment.

- Comfortable material – much easier to work on compared to concrete.
- Save a number of different height settings.
- Available as a standalone system or as optional extra with Swiftflo Swing, DoubleGuard and Revolver milking systems.
- Robust design including heavy duty hydraulic rams.
- Can help increase cows milked per hour per operator.
- Ideal shed upgrade

MooMonitor +

Monitoring your herd's health while working to maximise your pregnancy rate

MooMonitor + brings you proven accuracy in heat detection and accurate health monitoring through rumination, resting, restlessness & activity.

- 5 year pro-rata warranty for peace of mind.
- Uses the most accurate measurement technology available.
- Almost a decade of battery life.
- Cloud based system – allows for continuous updates – if your computer goes down, your data is safe like Facebook.
- Each tag has a wireless range potential of over one kilometre line of sight.
- One of the lightest monitors on the market –easier on cows.
- 2 way App – Use your cell phone to monitor and make changes to herd data as well easily assign tags.

*Assign collars to cows using
your mobile phone...*

Accurate Heat Detection

- Gives you more confidence and better judgement in knowing when to breed cows.
- Helps you to increase your pregnancy rate –making you more money from the same number of cows.
- Find cows with fertility problems in the herd sooner. Helps reduce the use of hormones in the herd – lowering expenses.

Accurate Health Monitoring

- Allows you to find cows with health problems sooner through the detection of a drop in rumination.
- Helps to reduce the culling rate in the herd by having more information of the health of your herd.
- Monitor the cows you have treated to see if they are improving.
- Monitor the impact of feed changes.

ClusterCleanse

Are you looking to lower your SCC?

Flush away Mastitis

Unique back-flush system that sanitises every claw after every cow.

- Helps to reduce SCC and improves milk quality – better price for your milk.
- Helps to reduce the spread of contagious mastitis between cows.
- Labour saving - no need to dip claws manually.
- Better udder health – helping to reduce unnecessary culling in the herd.
- A simple system that can be retrofitted to any milking shed.

Innovations & Design

Scientifically developed and proven.

- Dairyking milking sheds produce up to 5% more milk per milking and milks each cow up to 1 minute faster.
- Dairyking milking equipment has the lowest levels of inflation slip in the world, this is the only direct method how milking equipment can influence mastitis (inflammation caused by infection).
- Dairyking feeders help each cow maintain their best possible condition, increasing milk yields and reducing the number of times the vet has to be called.
- Dairyking built a new climatic performance laboratory for enhancing the performance of Dairyking's milk cooling equipment.

We use Science and Technology to
make dairy farming more profitable,
enjoyable and sustainable.
